

AIRMAN SYLLABUS

U.S. Coast Guard ATTC
A600S1 (04/14/2003)

AIRMAN SYLLABUS

U.S. Coast Guard ATTC
A600S1 (04/14/2003)

Foreword

Welcome to Coast Guard Aviation! Upon completion of your initial training, you will become a member of the best team in aviation. The goal of this syllabus is to provide you, the trainee, with a proficient, safe and standardized method to prepare for an aviation “A” school. This syllabus should be completed before you begin “A” school; it is an E-4 qualification.

As an Airman, you must possess the skills necessary to complete the tasks required to support aircraft operations at an air station. The training outlined in this syllabus will provide you with those skills.

This course consists of the following pamphlets: *E-4 Aviation Administration, Airman Handbook*, and the *Airman Syllabus*. The first two pamphlets will help you in meeting the standards of the Airman Syllabus. You should complete each chapter prior to demonstrating the skills to your instructor for Airman Syllabus sign off.

Each task will be demonstrated or explained by a rated aircraft technician, who is also your instructor, who will help you become proficient, and who is confident in the performance of the task. Your instructor will sign off each task and make comments in the comment section when you reach the indicated performance level.

Foreword (Continued)

The Flight Physical, ALDIST 059/98, authorizes the individual to apply for an aviation class “A” school without having to submit an aircrewman candidate physical with the training request for "A" school, irrespective of unit type or location. However, physicals are still required in order to receive orders, and orders will not be issued as long as a flag exists. A “NO-PHY” flag indicates that an aircrewman’s physical has not been received at Headquarters. An “INCPHY” flag indicates that the physical has been received at headquarters, but not yet approved by CGPC-ADM-1. Once approved, CGPC-ADM-1 will return the physical to EPM-2, where the flag is then removed and the member is considered physically qualified for assignment to school. CGPC-EPM-2 will forward the original approved physical to the medical clinic at Support Center Elizabeth City where the physical will be kept until the member receives orders to aviation “A” school.

The Swim Test, (IAW [COMDTINST 3710.1](#) (series) Air Operations Manual), shall be completed prior to attending “A” school. The swim test is a prerequisite for the 9D5/9U44 “Dunker” and should be taken as soon as possible after arriving at your unit so remedial training can be provided if necessary.

Foreword (Continued)

You must also complete the ATTC Math Pre-Test (which is a computer-based, math refresher course) located at:

<http://www.uscg.mil/hq/attc/index.htm>

or

<http://cgweb.arsc.uscg.mil/attc/>

The importance of basic math cannot be overemphasized, “A” school students must be comfortable with basic math operations. If you need additional math training after completing the Math Pre-Test, you may order a Basic Math correspondence course (BAMATH, course code edition 0485-1) that is maintained by the Coast Guard Institute.

The MRNPO course is required to be completed before a member may be promoted to E-3 or E-4. Often, members with prior military service who start Coast Guard service as an E-3, fail to complete the MRNPO course before “A” school. This failure prevents promotion to E-4 at graduation with the rest of the class. ATTC is not allowed to order courses or tests for “A” school students. Airmen must make all arrangements necessary, with their units Educational Service Officer (ESO) prior to leaving for “A” school.

The Leading Chief Petty Officer at your unit will review your progress in the syllabus in a monthly review meeting.

Performance Levels:

- [D] **Demonstrated**
Demonstrated by the technician/instructor. Used to introduce a new task to the student.
- [P] **Practiced**
The student is pre-briefed and practices the task.
- [I] **Intermediate**
The student demonstrated a thorough understanding of the task. The task is performed without any CRITICAL errors. The student required only minor guidance from the instructor.
- [S] **Standard**
The student performed the task properly, accurately, and safely. The student displayed proficiency without further instruction.

Terms:

Critical Error:

Any error that could jeopardize the successful completion of the task.

Minor Error:

Any error that detracts from the task, but does not jeopardize the completion of the task.

Task:

The activity to be performed.

Performance Levels:

- [D] **Demonstrated**

- [S] **Standard**
The student performed the task properly, accurately, and safely. The student displayed proficiency without further instruction.

Terms:

Critical Error:

Any error that could jeopardize the successful completion of the task.

Minor Error:

Any error that detracts from the task, but does not jeopardize the completion of the task.

Task:

The activity to be performed.

Task Sign off

After performing each task to the required performance level, your instructor will initial and date that task in your syllabus. Your instructor will also sign off at the end of each section, and write appropriate comments in the Comments section on the Instructor Sign Off page.

Guidelines for Making Comments

The comments section is used to record an accurate, fair, and complete summary of each training session. The comments should provide sufficient detail to be useful to the student and other instructors. Some areas that should be addressed are as follow:

- Task performance
- Critical errors
- Minor errors
- Procedural knowledge
- Judgement
- Attitude, professionalism, and motivation
- Recommendations to the student
- Recommendations for additional training

Task Sign off

After performing each task to the required performance level, your instructor will initial and date that task in your syllabus. Your instructor will also sign off at the end of each section, and write appropriate comments in the Comments section on the Instructor Sign Off page.

Guidelines for Making Comments

The comments section is used to record an accurate, fair, and complete summary of each training session. The comments should provide sufficient detail to be useful to the student and other instructors. Some areas that should be addressed are as follow:

- Task performance
- Critical errors
- Minor errors
- Procedural knowledge
- Judgement
- Attitude, professionalism, and motivation
- Recommendations to the student
- Recommendations for additional training

Requirements for the AST Candidates

If you are an AST candidate, you must also complete the page labeled AST. Because a high level of physical fitness is required at AST “A” School, the physical fitness/swimming prerequisite screening (number 3) must be maintained up to the reporting date for “A” school.

Many students in AST “A” School are unable to complete the course because they lack the mental or physical stamina needed to meet the challenging regimen. Some students have pre-existing medical problems which they have not fully realized until they perform demanding physical training on a regular basis. Therefore, it is extremely important that you evaluate your overall medical condition, fitness level, and degree of confidence realistically and honestly, and inform your supervisors.

Failing to complete AST “A” School can set your aviation career back more than a year.

AST Airman Supervisors

We have high hopes that your thorough screening of AST candidates will have the greatest positive impact on graduating more AST’s. To ensure that only the best candidates are given one of the *few* AST slots available each year, it is imperative that units provide AST airmen a challenging PT program. It is essential for both the AST rate and the Coast Guard that any medical limitations are discovered while in the Airman Program.

If facilities are available, AST airmen should work out at least 3 times per week at their units, and screening tests should be administered at the beginning of every workout. By no later than 30 days prior to reporting to AST “A” School, a well-prepared AST airman must be able to complete and comfortably pass the screening test every other day for a week (Monday, Wednesday and Friday). All elements of the screening test must be completed within a 1-hour session, and physical training must continue in order to maintain conditioning until AST airmen report to ATTC.

Requirements for the AST Candidates

AST

Complete the following tasks if you are an Aviation Survival Technician (AST) candidate.

	Level	Initial	Date
1. Inspect and repair rescue swimmer mask, snorkel and fins.	[I]	_____	_____
2. Demonstrate the use of the rescue swimmer mask, snorkel and fins in a swimming pool environment.	[I]	_____	_____
3. Perform AST "A" School physical fitness/swimming prerequisite screening. <u>The following is to be completed within 60 minutes. This includes rests and changing clothes between exercises.</u>	[S]	_____	_____
A. Two minute push-ups	42 ea.		
B. Two minute sit-ups	50 ea.		
C. Pull-ups	5 ea.		
D. 1.5-mile run	12 min.		
E. 500-yard swim	12 min.		
4. Inspect and service an MJ rescue basket in accordance with MPC 256022.	[I]	_____	_____
5. Inspect and service a collapsible stokes litter in accordance with MPC 256028.	[I]	_____	_____
6. Inspect and service a rescue survival strop in accordance with MPC 256006.	[I]	_____	_____
7. Demonstrate the use of the following pyrotechnics:	[S]	_____	_____
A. MK-124 marine smoke illumination signal			
B. MK-79 illumination signal
